## MDE-12T, MDE-24T, MDE-36T

Transporting small medical cylinders just got a whole lot easier. Just add a top to the next medical cart you order from CryoVation and you'll distribute your D, E and M6 cylinders with ease.

Constructed from 14 gauge steel and strong, 1/2" square steel tubing, these tops not only secure your cylinders in place but also protect them from any falling objects.

Every top is lockable for added security, ensuring the safe delivery of your gases. Simply add a "T" to your next medical purchase to add the security and peace of mind a topped medical cart provides.

## Enclosed Medical Delivery Carts

Designed to meet D.O.T. specified requirements for transporting compressed gas, CryoVation's enclosed medical delivery carts are an enclosed cylinder transportation rack designed to provide storage for D or E medical cylinders.

This cart stores cylinders on horizontal racks that are coated to protect cylinders from damaging metal-to-metal contact as well as from adverse weather. Available for multiple quantities, CryoVation's enclosed cylinder delivery carts provide you with one more quality tool for delivering gas. Its coated racks and enclosed delivery compartment make sure your cylinders arrive safe and sound.

## Utility Wagon

The standard utility wagon is designed to carry D and E medical cylinders, as well as smaller industrial cylinders, quickly and easily. The Florida Utility Wagon (right) comes with a removable side (not shown) to better facilitate the loading and unloading of cylinders. Both utility wagons feature CryoVation's E-Track strapping system for the easy securing of cylinders. The standard utility wagon is slightly smaller for more maneuverability.

### Florida Utility Wagon (AC-60)

Height: 44"

Width: 27"

Weight: 276 lbs.

Wheels: SC-31, SC-32

Cylinder capacity: D/E, 55 ea.
