CryoVation Completes New Industrial Gas Fill Plant for County Welding

FORT MYERS, Fla. (June 23, 2010) – CryoVation has completed a new industrial gas cylinder filling plant for County Welding Equipment Co. in Pompano Beach, FL.

The plant features a customized traversing manifold system for the space-conserving and efficient filling of oxygen, argon, nitrogen and carbon dioxide cylinders. CryoVation also provided cryogenic and CO2 pumps, vaporizers, control panels, vacuum pumps and a liquid filling system.

“CryoVation did an outstanding job with this project,” said County Welding President Richard Segal. “We could not have asked for better equipment or customer service.” Founded in 1974, County Welding is a supplier of welding equipment, industrial gases, medical gases, propane and helium.

CryoVation is a manufacturing firm specializing in innovative cylinder filling systems. The company, with locations in Florida, Indiana and New Jersey, specializes in whole-plant systems, system upgrades and a full line of equipment and parts tailored to the needs of the industrial, specialty gas, medical oxygen and beverage gas industries. For information about equipment and services, contact CryoVation at (239) 337-1114 or info@cryovation.com. More information is available online at www.CryoVation.com.
