## **CryoVation Unveils Automated CO2 Filling System**

FORT MYERS, Fla. (August 8, 2011) – CryoVation announces the release of our updated SequeFill™ automatic, palletized CO2 or nitrous oxide cylinder filling system.

SequeFill provides sequential, unattended filling of palletized or individually loaded CO2 cylinders, reducing labor and increasing accuracy.

The SequeFill system includes a control console with full-color touch screen display, a platform scale with 5000-pound capacity, and a Retracto manifold with retractable fill hoses. The SequeFill system features individual air-actuated ball valves and vent, fill and bypass control valves, and industrial PLC control.

CryoVation is a manufacturing firm specializing in innovative cylinder filling systems. The company, with locations in Florida, Indiana and New Jersey, specializes in whole-plant systems, system upgrades and a full line of equipment and parts tailored to the needs of the industrial, specialty, medical oxygen and beverage gas industries. For information about equipment, services and specialty gas training classes, contact CryoVation at (239) 337-1114 or [info@cryovation.com](mailto:info@cryovation.com). More information is available online at [www.cryovation.com](http://www.cryovation.com).
