**FOR IMMEDIATE RELEASE**

## **CRYOVATION OFFERS VALUABLE FDA COMPLIANCE TRAINING**

FORT MYERS, Fla. (August 16, 2009) – CryoVation, LLC recently presented its first FDA Compliance Seminar. Training focused on Current Good Manufacturing Practices (CGMP) and offered participants a comprehensive curriculum designed to meet documented training requirements of 21 CFR 211.25.

The seminar focused on quality control, training, equipment cleaning and maintenance, labeling, finished product testing, warehousing, distribution, complaints and recalls. CryoVation instructor Ray Borzio also updated participants on electronic registration requirements and July 2009 changes to the USP Monographs.

Danny Hagan, co-owner of Logan Hagan Welding Supply, Inc., in Statesboro, Ga., said the seminar was informative and provided concrete tasks for him to share with his staff. “There were practical applications that I found very useful, and I was alerted to some changes I need to make in the way we operate,” Hagan said.

Future seminars are being scheduled; contact CryoVation to register.

In addition to the FDA Compliance Seminar, CryoVation also sponsors a quarterly Specialty Gas Institute, a weeklong laboratory in specialty gases production and gas analysis. The next Specialty Gas Institute with available seats is Dec. 14-18.
